Experienced backend developer in developing and maintaining complex systems using various technologies such as NodeJS, Couchbase DB, Redis, Typescript, ScyllaDB, Kafka and more. Proficient in API development, integration with third-party services, and working within Agile frameworks.

Work History

2021-03 - Current

Senior Back-End Developer (nodejs)
SABUY TECHNOLOGY PUBLIC COMPANY LIMITED, Bang Khun Thian

- **API Payment Gateway** :Developed APIs for banking operations (payment, deposit, top-up, withdrawal) for KBank, BBL, SCB, AIS, True, and DTAC. Facilitated transactions via vending machines, web counters, and SabuyMoney app.
- **Master Data API**:Created a flexible API using Couchbase DB for managing master data, incorporating schema validation and permission checks.
- **E-wallet API** :Managed API processes for SabuyWallet and vending machine wallets, enabling wallet creation, balance checks, and adjustments through Kafka for efficient processing.
- **API File Upload**: API for File Upload to S3 provides functionality for managing file uploads, ensuring data integrity, security, and comprehensive audit logging capabilities. It includes file type validation and script checking to enhance security measures and ensure only authorized files are uploaded
- **Internal Library**: Developed a library for file uploads to S3 and SFTP. Improved error handling for AJV validation, focusing on discriminator-based error reporting. Added options attributes in API Swagger for response data caching using req.params and req.query.
- **Courier API Management**: Developed APIs for managing courier services and other operations, including integration with third-party services like Lazada.

2020-02 - 2021-01

Software Developer
BizPotential Co. Ltd., Param 3

- **Education Web**: Worked on admissions, registration, and grade results web applications

2017-10 - 2020-02
